

# MobilityPro Health

*Smart Autonomous Wheelchair for Elderly Mobility*

## Company Overview

MobilityPro Health transforms Comfy Chairs Ltd. into a healthcare technology innovator. We develop smart autonomous wheelchairs that restore independence and dignity to elderly users while providing peace of mind to caregivers and families.

## Our Products

- **AutoGlide** - Premium consumer wheelchair with full autonomous navigation
- **VitalRide** - Healthcare facility solution focused on vital monitoring and fleet management

## Data Collection

Our chairs collect the following data to enhance user safety and experience:

- **Heart Rate & Respiratory Rate** - Early detection of cardiac and breathing issues
- **Location & Activity** - Navigation optimization and mobility wellness tracking
- **Falls & Emergencies** - Immediate caregiver alerts and emergency response

## Business Model

We operate a dual-channel strategy combining hardware sales with recurring subscription revenue:

- **B2B Channel** - Nursing homes, hospitals, and rehabilitation centers purchasing fleet solutions with management subscriptions
- **B2C Channel** - Direct sales to seniors and families with CareConnect subscription for monitoring and telehealth

## Market Opportunity

With **65 million people** worldwide needing wheelchairs and **22% projected growth** over the next decade, the smart mobility market represents a \$2.8 billion opportunity by 2034. Our Year 3 revenue target is **\$8.65 million**.

*Independence. Dignity. Peace of Mind.*
